ABSTRACT

2048 GAME

The 2048 game is played on a 4-by-4 square grid that is partially filled with tiles labeled with powers of 2. The primary goal of the game is to merge randomly generated tiles in order to create a tile labeled 2048. It is one of the best beginner-friendly projects that every novice programmer should take as a challenge. Python offers multiple options for developing GUI (Graphical User Interface). Out of all the GUI methods, tkinter is the most commonly used method. It is a standard Python interface to the Tk GUI toolkit shipped with Python. Python with tkinter is the fastest and easiest way to create the GUI applications. Creating a GUI using tkinter is an easy task.

INTRODUCTION

- What is game 2048 all about and how to play?
- What is objective of 2048 game?
- What is logic of 2048 game?

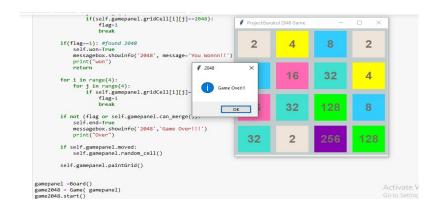

GAME

IMPLEMENTATION AND RESULT

PROJECT TIMELINE

PROJECT THVIELINE		
DATE	DURATION	TASK
19/12/22	1 day	Abstract
		preparation
20/12/22	2 days	Programming
22/12/22	1 day	Correcting errors
30/12/22	1day	Finalisation
